SUMMARY

Final-year student majoring in Management Information Systems (MIS), skilled in market research and business analysis; identifying business pain points and proposing improved technology solutions; data analysis; researching and working with AI. Experienced in using AI to build websites, chatbots, and automation pipelines.

EDUCATION

- Bachelor of Management Information Systems (MIS)** 2023 – 2027
- University of Economics and Law (UEL), Ho Chi Minh City
- Cumulative GPA: 8.63/10.0
 - Academic Encouragement Scholarship – Semester 2 (2025)

EXPERIENCES

- Sợi Nắng Program – Nguyễn Hiền Foundation** Oct 2024 – Now
- Role: Marcom Leader
- Managed, coordinated, and planned communication activities.
 - Applied AI agents for image generation and content ideation, reducing manpower and event runtime by 50%.
 - Led the Spring 2026 Retreat program

PROJECTS

- Scientific Research: GenAI System for Evaluating Greenwashing in Banking** [link](#) Oct 2025 – July 2026
- Role: Team Member | Business Analyst & Dev
- Identified the need for transparency around greenwashing; built a system to extract PDFs to Markdown and analyze ESG reports, using Chain-of-Thought prompting with the Gemini API to evaluate and quantify unstructured data.
 - Optimized system accuracy through a 2 layer validator based on 41 GRI criteria, reducing AI hallucination by 80%.
 - Quantified greenwashing scores, derived practical insights, and optimized audit time and process by 70%.
- Testing and Evaluation of the Hasaki.vn System** Feb 2026 – May 2026
- Role: Team Member | QA Analyst
- Analyzed system vulnerabilities; designed 25 test cases using EP/BVA techniques for 4 high-risk modules.
 - Integrated automated testing with Selenium WebDriver and AI-driven testing, achieving a real 92% pass rate.
 - Found 2 bugs and performed risk analysis, proposing web optimization solutions that improved customer experience, and improved business efficiency
- Velura Fashion E-commerce Website Development** [link](#) April 2026 – July 2026
- Role: Team Leader | Fullstack Dev
- Identified sales pain points and proposed a Style Quiz and personalized recommendation solution powered by the Gemini API, improve personalized shopping experience and increasing the conversion rate by 50%.
 - Improved business processes; wrote specifications (BPMN/UC); conducted UAT testing and optimized the website
 - Used AI to design mockups and prototypes in Figma to test functional flows; used Vibecoding to support full-stack website development; shipped to production

CERTIFICATES

Google Cloud Training Day: Big Data & Machine Learning Fundamentals – Cloud Ace (2024)
Introduction to SAP S/4HANA with ERPsim – NGIG (2024)
English – TOEIC 850 (Reading & Listening)

ACHIEVEMENTS

- Top 5 University-level Scientific Research (2026) 2026
- Top 6 Community Project – Garbage Enzyme Project, SCG Vietnam (2024) 2024
- Lương Văn Can Foundation Scholarship 2025-2026

SKILLS

Business Analysis: Writing specifications, BPMN/Use Case/DFD Diagrams, UAT Testing, Sprint Planning, Market Research, Success Metrics
Design: Figma, Canva.
Programming: Python, HTML/CSS, ReactJS.
AI: Generative AI, Gemini API, Claude, n8n, OCR, API Integration, MCP
Soft Skills: Teamwork, Problem Solving, Project Management, Communication. Good English.
